| The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply | | | | | | |
| A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). | | | | | | |

Application/Control Number: 09/914,454

Art Unit: 1645

DETAILED ACTION

- 1. It is noted that claims 6-42 are improper multiple dependent claims and should be corrected in response to this action.
- 2. It is noted that claims 41 and 42 are presently drafted as "Use of" claims. For purposes of the restriction the Examiner views them as methods of using the product; however these claims should be amended to conform to standard US practice.
- 3. It is noted that claim 22 recites patented documents (for example WO 99/57280, WO 99/55873). Patented documents should not be recited in the claims; the claims are unclear. The claim should be amended in response to this action.

Election/Restrictions

4. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-22, drawn to an immunogenic composition.

Group II, claims 23-26, drawn to a vaccine composition.

Group III, claims 27-31, drawn to an adjuvant composition.

Application/Control Number: 09/914,454

Art Unit: 1645

Group IV, claims 32, 33, 40 and 41, drawn to a method of stimulating an immune response.

Group V, claims 34-36 and 40-42, drawn to a method of immunizing a host animal to induce a protective response.

The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The technical feature of the first claimed product, Group I, the immunogenic composition is not a special technical feature in view of the disclosure of this immunogenic composition comprising a Neisseria antigen and an adjuvant (CpG) in WO 99/58683, see page 36, lines 15-17, see also WO 98/18810. As such there is not a special technical feature and therefore the Groups of inventions I-V, lack a corresponding special technical feature.

5. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows: SEQ ID NO: 1-27

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable

Application/Control Number: 09/914,454 Page 4

Art Unit: 1645

or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

Applicants should elect one SEQ ID NO for examination with regard to the immunostimulating oligonucleotide:

Claims 19, 29, SEQ ID NOS: 1-27

Claims 21, 31 SEQ ID NOS: 1-25.

The following claim(s) are generic: claim 1, and SEQ ID NO: 31 (the Neisseria antigen).

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: the technical feature of the claimed SEQ ID Nos, CpG, is not a special technical feature in view of the disclosure of claimed SEQ ID NO:12 being disclosed in 6218371.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to N. M. Minnifield whose telephone number is 571-272-0860. The examiner can normally be reached on M-F (8:00-5:30) Second Friday Off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lynette R.F. Smith can be reached on 571-272-0864. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
